

Teach Your App to Talk (and Actually Listen)

Real-world conversational intelligence with
UpSight

Hi, I'm Rick Moy

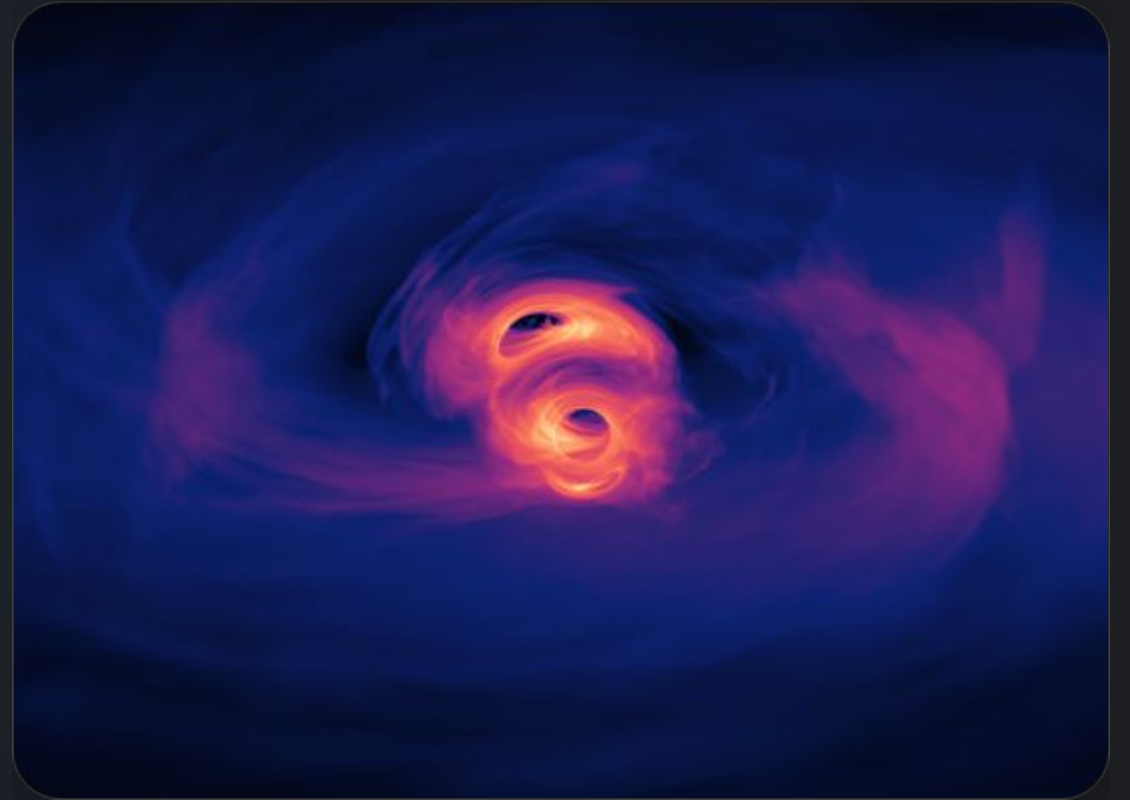

- Builder of UpSight
- DeepLight - Full Stack Product & Marketing Agency
- Dozen startups, 5+ exits
- Cyber, Cloud, AI

OBSESSED

Learning

Conversations Are Dark Matter

- ✓ Zoom, notes, CRM... all siloed
- ✓ No shared memory of customers
- ✓ "Insight" = loudest voice in the room

From Talk to Strategy & Tactics

Plan

Define goals, risks,
unknowns

Connect

People across channels
& silos

Collect

Calls, Voice, Notes,
Research

Synthesize

Themes, Personas,
Segments, Features

Act

Prioritize & Execute
next steps

Curiosity

"Goal: learn X from segment Y"

UpSight generates conversation guides automatically.

✓ Multi-modal: voice, notes, links, docs

\ GUIDE

1. How do you currently handle [Pain Point]?

2. What features are missing from [Competitor]?

3. Context: User is on Enterprise Tier.

DEMO

Inspiring & educational

Ask Uppy What to Do Next

Sidebar Ask Uppy Chat

"What should we fix first for Enterprise users?"

Ranks pains, themes, and opportunities based on real conversations.

Architecture: Brains Around Your Data

Framework

Remix React TS

Mastra

Node.js

Data Core

Postgres

Vector Store

Jobs

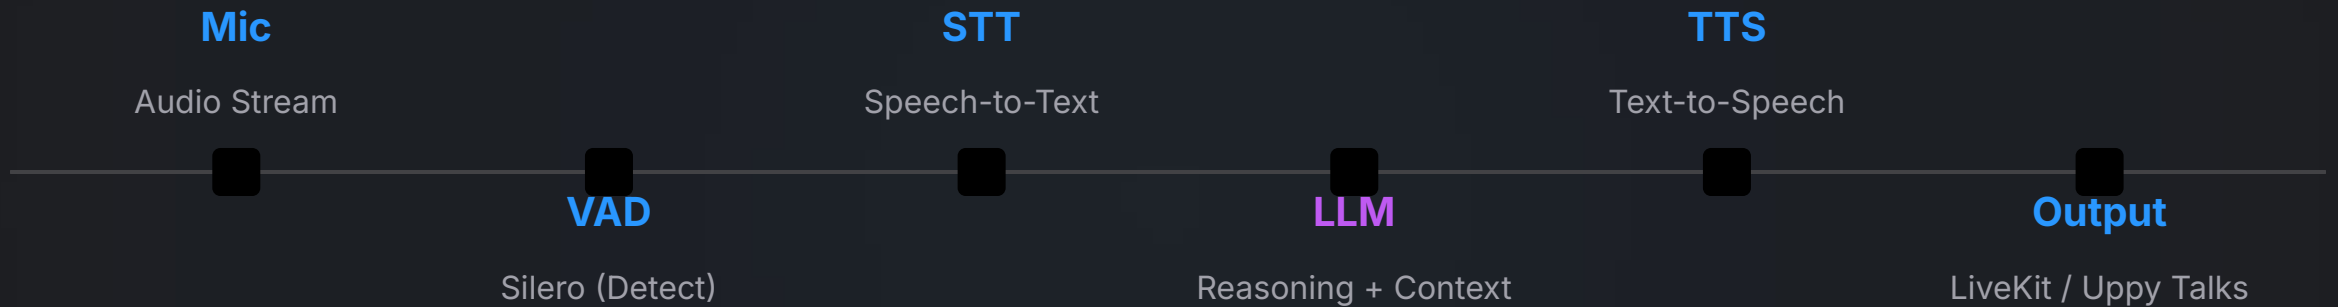

Mastra agents,
workflows LLM Workers

Analysis Pipelines

Trigger.dev

 Voice & Media handled by LiveKit (WebRTC)

Adding Voice Pipeline with Control

Pipeline = control over turns + depth.

Tried "realtime APIs" (OpenAI / Google) → Interruptions, shallow reasoning.

What I Learned Shipping This

- ✓ **Own the context** – your data > internet
- ✓ **Pipelines > black boxes** – STT → LLM → TTS
- ✓ **Start narrow & Broad** – one killer workflow first
- ✓ **Measure insight** – for pain & actions
